availity[®]
PATIENTS. Not paperwork.

Availity removes administrative inefficiencies, reduces costs and improves patient-provider interactions.

BUSINESS SERVICES

Streamline your workflow, reduce your costs, and improve patient relationships.

- **Health Plan Connections** HIPAA-compliant transactions in real-time and batch via Web and electronic data interchange, including: Eligibility and Benefits; Authorizations and Referrals; Claims Submission; Claim Status; and Remittance.
- **Government Connections** Availity provides real-time Eligibility and Benefits, in addition to batch Claims.
- **CareRead®** Swipe a patient's member ID card through a card reader, automatically translating the information contained on the card onto Availity transaction pages.
- **CareCost EstimatorSM** Determine a patient's financial responsibility based on real-time member benefits, provider contractual allowances, deductibles and benefit maximum accumulators.
- **CareCollect®** Process patient payments for all types of payment situations via the Availity secure Web portal — all while the patient is still in your office.

CLINICAL SERVICES

Help improve patient safety, eliminate duplicate medical procedures, reduce unnecessary services and protect against fraud through a consolidated view of patients' health care services across multiple physicians and providers.

- **CareProfile®** Real-time access to care-related information from multiple sources, including: diagnosis details and associated procedures; doctor and hospital visit history; and prescription history.
- **Patient Communication** A variety of Web-based doctor-patient platforms to facilitate efficient communication.
